Islas Secas Resort: Panama Paradise

Last month's *PCS Travel Guide* issue somehow overlooked Islas Secas Resort which should have been included.

Viva Panama! Islas Secas Resort is the closest land-based lodge to the world famous fishing grounds of Hannibal Bank and Isla Montuosa. Whether your preference leans toward inshore or offshore, fly-fishing or conventional, avid anglers can spend more time reeling in the "big" ones, and less time traveling to find these amazing catches. The diversity and size of fish in these waters is remarkable; Monster yellowfin tuna, black and blue marlin, sailfish, cubera snapper and roosterfish are just some of those long elusive catches you'll snag fishing with Islas Secas.

Islas Secas Resort is also a food lover's paradise with every meal created especially for your taste. Coupled with the resort's exclusivity—only 14 guests at time—and this experience becomes an adventure tailored just for you. So let Islas Secas take you on a fishing journey with their unbeatable location, top of the line boats and tackle, and world class fishing team. You'll be talking about this trip for years to come! For details call 800-377-8877 or visit www.islassecas.com.
